1. Identification / recognition

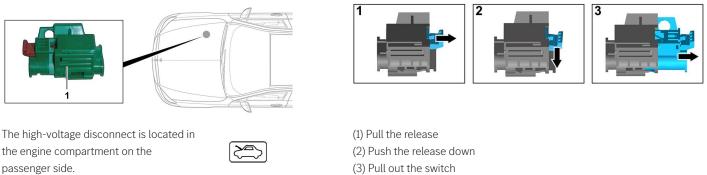

Deactivation of the high-voltage system

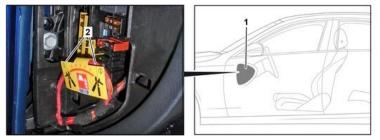

In all other cases, the high-voltage system should be deactivated as follows:

Option 1: High-voltage disconnect

Option 2: Alternative high-voltage disconnect

The alternative high-voltage disconnect is located under the cover of the fuse box in the cockpit on the driver's side. It is indicated with a sign.

Remove the cover (1). Cut the cable at the marked point (2).
