

voltage

Note: Please see our <u>emergency response guide</u> for more information

1. Identification / recognition

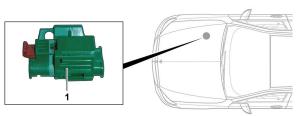

3. Disable direct hazards / safety regulations

Deactivation of the high-voltage system

In all other cases, the high-voltage system should be deactivated as follows:

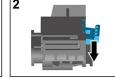

Option 1: High-voltage disconnect

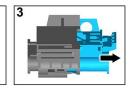

The high-voltage disconnect is located in the engine compartment on the passenger side.

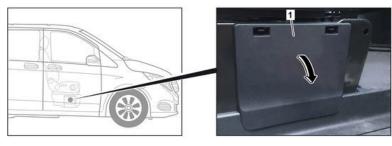

(1) Pull the release

(2) Push the release down

(3) Pull out the switch

Option 2: Alternative high-voltage disconnect

The alternative high-voltage disconnect is located in the base of the right-hand front seat. It is indicated with a sign.

Remove the cover (1). Cut the cable at the marked point (2).

Disconnecting the 12 V battery

- 1. Remove the cover from the 12-volt battery.
- 2. Disconnect the negative cable of the 12-volt battery at the screw connection and secure it against unintentional contact.
