

voltage

Note: Please see our <u>emergency response guide</u> for more information

## 1. Identification / recognition

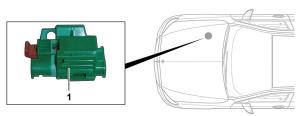

## 3. Disable direct hazards / safety regulations

Deactivation of the high-voltage system

In all other cases, the high-voltage system should be deactivated as follows:

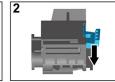

Option 1: High-voltage disconnect

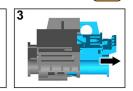

The high-voltage disconnect is located in the engine compartment on the right side in the direction of travel.

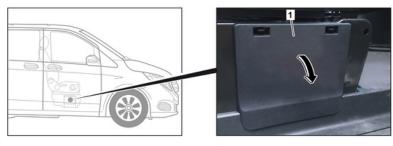

(1) Pull the release

(2) Push the release down

(3) Pull out the switch

## Option 2: Alternative high-voltage disconnect

The alternative high-voltage disconnect is located in the base of the right-hand front seat. It is indicated with a sign.

Remove the cover (1). Cut the cable at the marked point (2).

## Disconnecting the 12 V battery

- 1. Remove the cover from the 12-volt battery.
- 2. Disconnect the negative cable of the 12-volt battery at the screw connection and secure it against unintentional contact.
