

Airbag

Gas generator

Seat belt pretensioner

SRS control unit

Gas strut / Preloaded spring

Low-voltage batterv

Petrol fuel tank

Battery pack, High-voltage

High voltage power cable

High voltage component

Cable cut

Low voltage device that disconnects high voltage

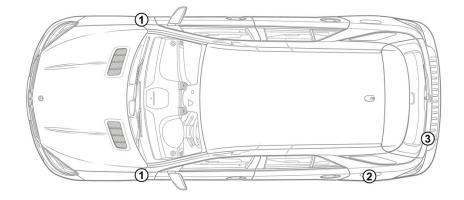

Note: Please see our <u>emergency response guide</u> for more information

1. Identification / recognition

EQ POWER

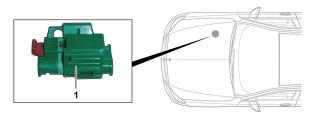

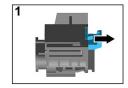

3. Disable direct hazards / safety regulations

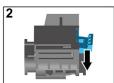

Deactivation of the high-voltage system

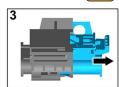

In all other cases, the high-voltage system should be deactivated as follows:

Option 1: High-voltage disconnect

The high-voltage disconnect is located in the engine compartment on the passenger side.

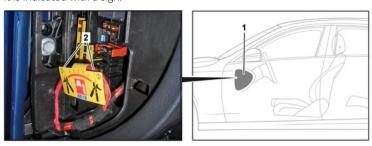

(1) Pull the release

- (2) Push the release down
- (3) Pull out the switch

Option 2: Alternative high-voltage disconnect

The alternative high-voltage disconnect is located under the cover of the fuse box in the cockpit on the driver's side. It is indicated with a sign.

Remove the cover (1). Cut the cable at the marked point (2).

Disconnecting the 12 V battery

- 1. Remove the cover from the 12-volt battery.
- 2. Disconnect the negative cable of the 12-volt battery at the screw connection and secure it against unintentional contact.
