

Note: Please see our emergency response guide for more information

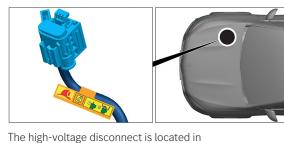

passenger side.

* * X

In all other cases, the high-voltage system should be deactivated as follows:

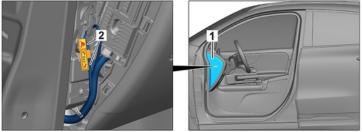

Option 1: High-voltage disconnect

(1) Pull the release (2) Push the release down (3) Pull out the switch

Option 2: Alternative high-voltage disconnect

The alternative high-voltage disconnect is located under the cover of the fuse box in the cockpit on the driver's side. It is indicated with a sign.

Remove the cover (1). Cut the cable at the marked point (2).

In order to ensure that there is no longer any residual voltage in the high-voltage system, wait approx. 20 seconds after switching it off.

The passive safety systems such as airbags and seat belt pretensioners will continue to be supplied with power by the 12-volt electrical system.

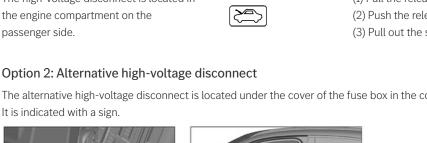

Disconnecting the 12 V battery

1. Remove the cover from the 12-volt battery.

2. Disconnect the negative cable of the 12-volt battery at the screw connection and secure it against unintentional contact.

The passive safety systems (airbags and seat belt pretensioners) are deactivated.

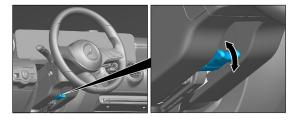

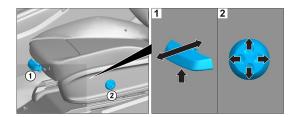

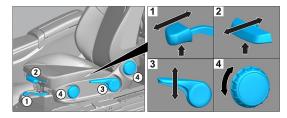

4. Access to the occupants

When rescuing the vehicle occupants, the components of the restraint systems (in particular pyrotechnic elements) must be taken into account in accordance with the information on page 1.

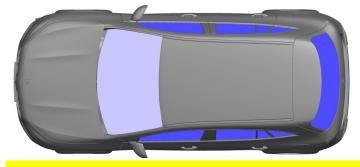

Steering wheel adjustment

Seat adjustment (mechanical)

5. Stored energy / liquids / gases / solids

		12 V		
Li-ion		400 V		
		35 L		
\$		560 ± 10 g		
All high-voltage cables have orange insulation.				

6. In case of fire

Use large volumes of water (H_2O) to extinguish a vehicle fire. Use large volumes of water (H_2O) to cool the Li-ion battery.

7. In case of submersion

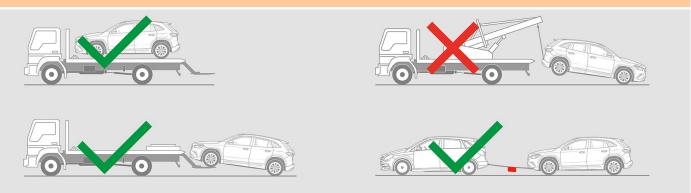

There is no risk of voltage in the bodywork.

After recovery of the vehicle:

1. Allow the water to drain out of the interior.

2. Commence deactivation of the high-voltage system (see Section 3).

8. Towing / transportation / storage

Maintain a safe distance from other vehicles.

Warning: Ignition of the battery possible						
9. Important additional information						
You can find more information in the <u>Guidelines for car towing services</u> .						
10. Explanation of pictograms used						
Hybrid Electric Vehicle on fuel of liquid group 2	General warning sign	Warning, Electricity	Flammable			
Hazardous to the hu- man health	Corrosives	Acute toxicity	Explosive			
Use water to extin- guish the fire	Use thermal Infrared camera	Bonnet	Remove smart key			
Air-conditioning com- ponent	Warning; low temperat- ure
