-  Seat belt tensioner
-  Gas-filled strut
-  Body reinforcement
-  Fuel tank
-  Restraint systems control unit
-  12 V Battery

Note: Please see our [emergency response guide](#) for more information

4. Access to the occupants

The SLS AMG is equipped with a safety system which uncouples the door hinges from the hinge arms when the vehicle comes to rest lying on its roof after an accident. Each door hinge (1) contains a pyrotechnic initiator (2) which is triggered by the restraint systems control unit. When the door lock is opened, the doors can be pulled off the hinge arms (3).
